Bali 5.2 • San Lorenzo

Marina di Cannigione

Year	2027
Cabins	5+2
Berths	11+2
Toilets	5+2
Category	A: 14
Overall lenght	15.90 m
Overall beam	8.16 m
Keel draft	1.40 m
Total sail	94 mq
Engine	2 x Nanni 115 HP
Fuel capacity	1200 lt
Water capacity	1320 lt

Equipment & Comfort

Battened mainsail 100%	Furling self tacking jib
Electrical winch for mainsail halyard	3 semi-automatic reef
Pulpits with polywood seating	Autopilot
Wind instruments	Solar panels
Plotter GPS and VHF	Dishwasher
Electric toilets	Generator 230 V
Air conditioning in dinette and cabins	Watermaker 240 l/h
Hydraulic system for salon tilting bay door	External shower with Warm water
Hydraulic tender lift	Fridge - freezer 634 L with chilled water and ice maker
Rear cockpit and forward cockpit cushions	Chaise longue cushions on helm station side
Radio&Music player	Grill on cockpit
Tender VTR keel and outboard engine 15 HP	Nespresso coffee machine
Inverter 48/230V	Wine cooler
Rigid hardtop on the flybridge	Bow thruster

The Boat

The BALI 5.2 benefits from Catana Group's expertise in designing high-performance and reliable catamarans. Onboard, the joy of life at sea blends seamlessly with a passion for sailing. The latest innovations from BALI Catamarans, the Beach Club and the Rooftop, enhance modularity, add new functionalities, and further optimize every space on the boat. The aft of the BALI 5.2 is a true Beach Club, featuring a hydraulic platform designed for both swimming and the tender. This unique concept also enables easy movement between both sides of the boat thanks to a full-width aft deck. You'll enjoy a friendly and inviting space, perfect for moments of relaxation and enjoyment by the water. At the heart of the 5.2's design is Bali's revolutionary open-space layout. The tilting aft door seamlessly merges the salon and cockpit, transforming the entire main deck into one expansive, sociable area. Whether entertaining guests or enjoying a quiet sunset, the sense of space and "one-ness" with the outdoors is unmatched. The Bali 5.2 is equipped with a powerful 48-volt electrical system, a feature normally reserved for much larger yachts. It also provides better support for modern onboard appliances like cooktops, air conditioning, watermakers. Sustainability meets performance with an optional 4200 W integrated solar array that spans the hardtop. With up to 4 kW of solar energy generation, the 5.2 can maintain critical systems and air conditioning without shore power—a major plus for long-distance or full time cruisers.
