JAWSS

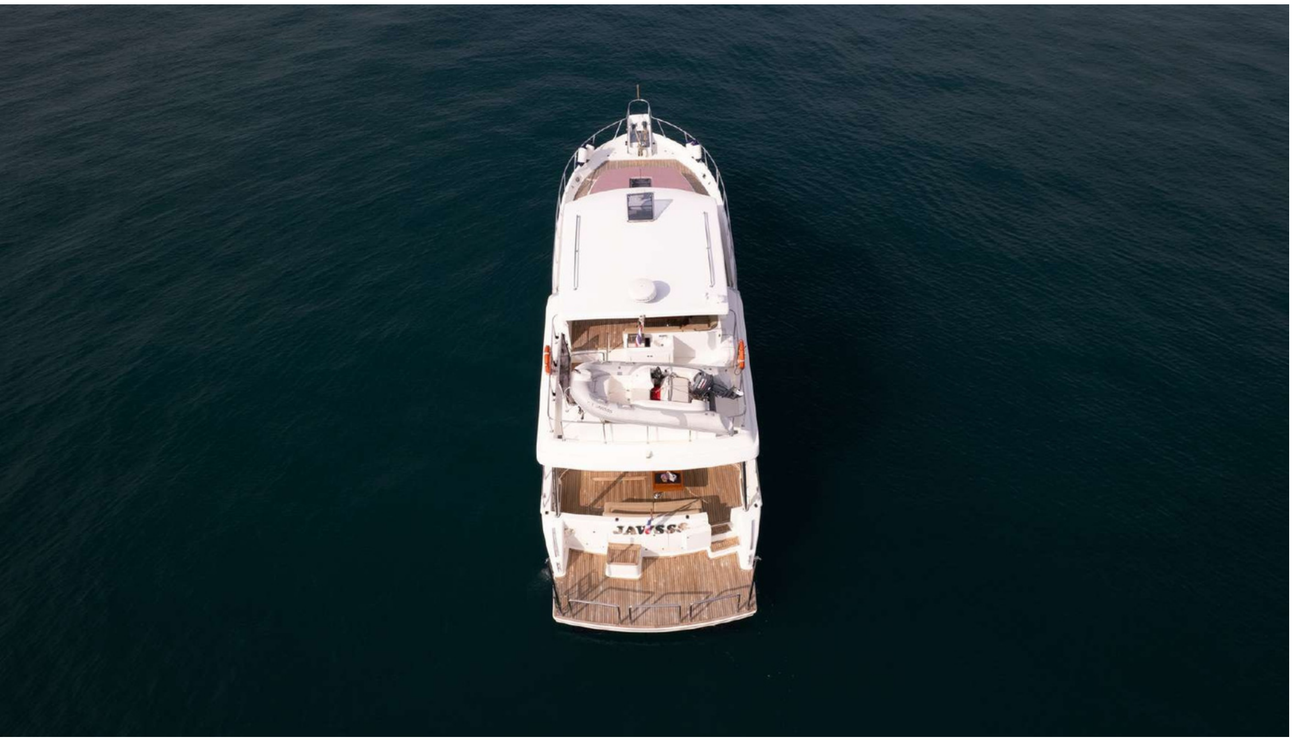

J A W S S

This ACTIVA 5800 from 2013 is the ideal family cruiser for the Andaman sea.
Equipped with 2 X John Deere engines, her maximum speed is 15 knots, and can cruise confortably at 12 knots.

First impressions of the interior of the Activa are extremely favourable. Teak is used extensively, and the quality of the woodwork and finish is equal to the best available anywhere. Small touches, like the paua shell inlays into the counter tops, indicate the local “flavouring”.

Water Capacity:	1000 L

JAWSS

Going down the curved companionway from the helm station to the lower deck brings one to three cabins. The forward cabin has a double bed mounted longitudinally, with easy access from either side. Just aft of that on the port side is a cabin with two single bunks, while on the starboard side the guest toilet and shower sits alongside the staircase and a storage cupboard. Exactly midships is the master stateroom, with a thwartships king-sized bed and ensuite bathroom. All bedrooms have air conditioning and CO2 gas detectors.

The saloon is the main entertaining area, with large TV-DVD, a bar tucked into the corner, and a beautifully inlaid electrically-adjustable cherry wood coffee/dining table. Comfortable leather-covered chairs complement the built-in settee, and discrete lighting is everywhere.
